

(7 Pages)

Max. Marks: 70

Note: (1) All questions are compulsory.

- Draw neat and labelled diagrams wherever necessary.
- Figures to the right indicate full marks.
- Answers to the questions in Section-I and Section-II must be written in two separate answer books.
- (5) Questions from Section-I attempted in the answer book of Section-II and vice-versa will not be assessed / not be given any credit.
- Answer to every new question must be started on a new page.

## SECTION - I **BOTANY**

Q. 1. Select and write the most appropriate answer from the given alternatives (along with its alphabets) for each subquestion:

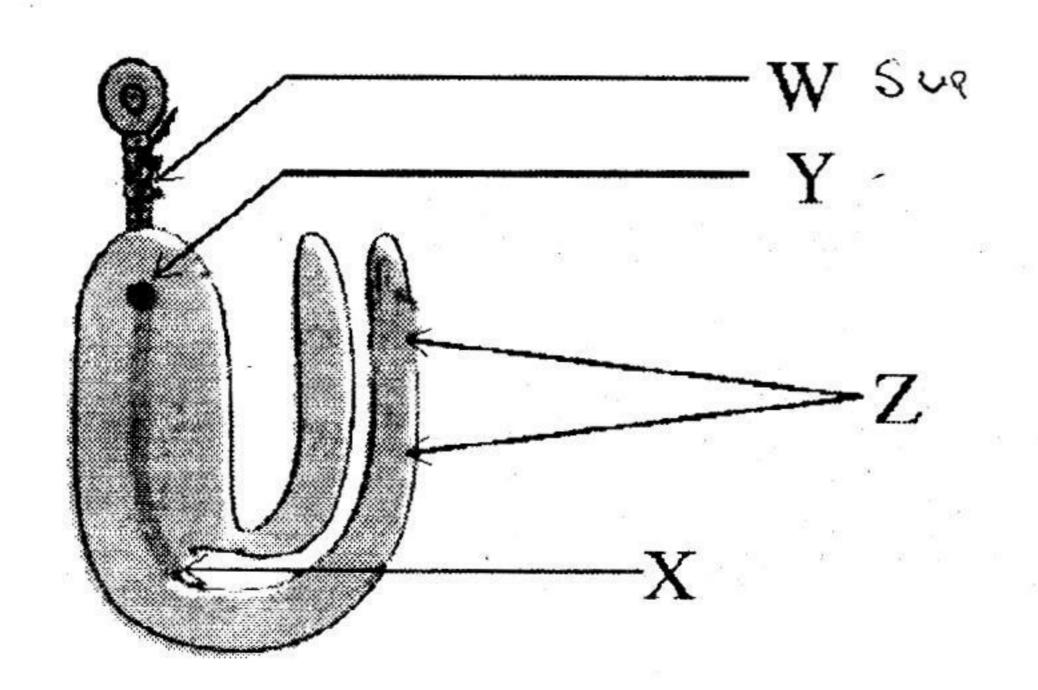

- The genotype of human blood group B is
  - (a)

  - (c) IAIA
  - (d) ii

| (ii)            | Breakdown of detritus into smaller particles is called     |
|-----------------|--|
|                 | (a) fragmentation  |
|                 | (b) leaching   |
|                 | (c) catabolism   |
|                 | (d) humification .   |
| (iii)           | In Brassica (rapeseed, mustard) variety is                 |
|                 | resistant to Aphids.                                       |
|                 | (a) Pusa A-4   |
|                 | (b) Pusa Gaurav  |
|                 | (c) Pusa Sawni   |
|                 | (d) Pusa Shubra  |
| (iv)            | The antibiotic chloromycetin is obtained from              |
|                 | (a) Sclerotiana libertine                                  |
|                 | (b) Aspergillus niger                                      |
|                 | (c) Streptomyces griseus                                   |
|                 | (d) Streptomyces venezuelae                                |
| (v)             | The enzyme is used to cut DNA at specific point.           |
|                 | (a) DNA polymerase   |
|                 | (b) Alkaline phosphatase                                   |
| 198             | (c) restriction endonuclease                               |
|                 | (d) DNA ligase   |
| (vi)            | R. Q. for proteins is about .                              |
|                 | (a) $0.7$ (b) $0.8$  |
|                 | (c) 0.9 (d) 1.0  |
| (vii)           | Ozone depletion is occuring widely in the stratosphere, it |
| ALS STEEL ASTER | leads to ozone hole caused mainly due to .                 |
|                 | (a) ethylene   |
|                 | (b) methane  |
|                 | (c) CFCs   |
|                 | (d) CO <sub>2</sub>  |
|                 | 2  |

| Q. 2. (A) Answer each question in 'one' | sentence only |  |
|---|---------------|--|
|---|---------------|--|

- (6)[12]
- (i) Give an example of the source of thermostable enzyme DNA polymerase.
- (ii) Give an example of the non-edible or poisonous mushroom, studied by you.
- (iii) Name the secondary metabolites in catharanthus roseus.
- (iv) What is meant by ecological succession?
- (v) Name the organism and enzyme which bring about alcoholic fermentation of sucrose.
- (vi) Enlist any 'two' floral adaptations in salvia.
- (B) Give schematic representation of carbon cycle. (2)
- (C) Attempt any <u>TWO</u> of the following: (4)
  - (i) What is a 'test cross'? Explain significance of a test cross.
  - (ii) Explain 'Wobble hypothesis' with the help of a suitable diagram.
  - (iii) What is a 'biopatent'? Explain it with a suitable example.
  - (iv) Name the parts W, X, Y and Z from the following figure:

| Q. 3. | <b>(A)</b>  | Atte             | empt any TWO of the following:  | (6) | [9] |
|-------|---|------------------|---|-----|-----|
|       |   | (i)              | Explain replication of bacteriophage with the help of a suitable diagram.                         |     |     |
|       |   | (ii)             | What are 'biofertilizers'? Explain them with suitable examples.                                   |     |     |
|       |   | (iii)            | Differentiate between anemophily and entomophily.   |     |     |
|       | <b>(B)</b>  | Ske              | tch and label V. S. of mature anatropous ovule.   | (3) |     |
| Q. 4. | 4. What is 'photophosphorylation'? Describe non-cyclic photophosphorylation with schematic representation. Give its significance. |                  |   |     |     |
|       |   |                  | OR  |     |     |
|       |   | 53<br>200 Helena | 'RNA'? Explain different types of non-genetic RNA grams and functions.                            | •   |     |
|       |   |                  | SECTION – II  |     |     |
|       |   |                  | [ZOOLOGY]   |     |     |
| Q. 5. | give  | en alt           | nd write the most appropriate answer from the ternatives (along with its alphabets) for each sub- |     | [7] |
| ₩     | que   | stion            |   |     | W   |
|       | (i)   |                  | ich of the following has normal vision?   | 53  |     |
|       |   |                  | Xc Xc   |     |     |
|       |   | × 2              | Xc Y  |     |     |
|       |   | (c)              | XC Xc   |     |     |
|       |   | (d)              | Xc Yc   |     |     |
|       | · · · · · · · · · · · · · · · · · · ·   |                  |   |     |     |
|       |   |                  |   |     |     |

| (ii)  | In DNA fingerprinting technique, radioactive DNA probe       |   |  |  |  |  |  |
|-------|--|---|--|--|--|--|--|
| 授     | is obtained from of female banded krait snake.               |   |  |  |  |  |  |
|       | (a)  | X chromosome                                |  |  |  |  |  |
|       | (b) Y chromosome   |   |  |  |  |  |  |
|       | (c) X and Y chromosomes                                      |   |  |  |  |  |  |
|       | (d)  | autosome                                    |  |  |  |  |  |
| (iii) | ) Abortion in the first trimester of pregnancy may occur due |   |  |  |  |  |  |
|       | to lack of   |   |  |  |  |  |  |
|       | (a)  | aldosterone                                 |  |  |  |  |  |
|       | (b)  | testosterone                                |  |  |  |  |  |
|       | (c)  | oestrogen                                   |  |  |  |  |  |
|       | (d)  | progesterone                                |  |  |  |  |  |
| (iv)  | ***************************************                      | contribute about 60% of the total volume of |  |  |  |  |  |
|       | the:   | semen.                                      |  |  |  |  |  |
|       | (a)  | Prostate glands                             |  |  |  |  |  |
|       | (b)  | Cowper's glands                             |  |  |  |  |  |
|       | (c)  | Seminal vesicles                            |  |  |  |  |  |
|       | (d)  | Bartholin's glands                          |  |  |  |  |  |
| (v)   | Lowering of blood pressure is related with the production    |   |  |  |  |  |  |
| 28    | of _   |   |  |  |  |  |  |
|       | (a)  | ADH   |  |  |  |  |  |
|       | (b)  | ANF   |  |  |  |  |  |
| 9     | (c)  | GH  |  |  |  |  |  |
|       | (d)  | LH  |  |  |  |  |  |
| (vi)  | Hun  | nulin is used to treat                      |  |  |  |  |  |
|       | (a)  | Diabetes mellitus                           |  |  |  |  |  |
|       | (b)  | Diabetes insipidus                          |  |  |  |  |  |
